

IGANGAN GODSPOWER

AI-Native Full-Stack Engineer · Agentic Tooling Builder

Lagos, Nigeria | +234 916 592 6869 | ighanghangodspower@gmail.com

GitHub: github.com/thirdbase1 | X: @one_shot_sx

PROFESSIONAL SUMMARY

Self-directed software engineer and AI-native product builder. I design and ship end-to-end AI agent systems in TypeScript — multi-agent coding environments, autonomous tool SDKs, REST APIs, and serverless infrastructure.

TECHNICAL SKILLS

Languages: TypeScript, Python, Go, Rust, JavaScript, SQL, Shell **Frontend:** React, Next.js, SvelteKit, Tailwind CSS, Monaco Editor, xterm.js **Backend:** FastAPI, Node.js, Go, WebSockets, REST API design, Pydantic

Cloud: Vercel Sandbox SDK, Docker, Neon Postgres, Redis **AI/Agents:** OpenRouter, OpenAI, Anthropic, multi-agent orchestration

PROJECTS

Open-Agent Vercel — Multi-Agent Coding Platform

TypeScript, Vercel Sandbox | github.com/thirdbase1/open-agent_vercel

Deployed and adapted an open-source multi-agent coding system on Vercel: web UI to durable agent workflow to isolated sandbox VM. ~3.1M LOC TypeScript.

| **Impact:** Owned and shipped a frontier-agent codebase — serverless deployment, microVM sandboxing.

Oneshotsx — Autonomous Agent SDK

TypeScript, Node.js - 3 stars | github.com/thirdbase1/Something-good-and-problem-solving

The Agentic Standard Library — a typed, npm-installable SDK: self-healing execution, captured shell, file ops, deep-research orchestrator.

| **Impact:** SDK authoring — exposing agentic capability as a clean, typed, installable package.

Gitcode — Realtime AI Software Engineering OS

TypeScript, Python, Go | github.com/thirdbase1/Gitcode

Realtime AI engineering environment: code, execution, repos, terminals, and AI reasoning in one surface.

| **Impact:** Cursor-class engineering environment with multi-language runtime orchestration.

Veilsdk — Industrial Full-Stack AI Engineer

TypeScript, Vercel Sandbox - 2 stars | github.com/thirdbase1/Veilsdk

Dual-agent AI platform generating multi-file full-stack apps with persistent codebase awareness.

| **Impact:** Hands-on agentic AI infrastructure — microVM orchestration, multi-agent review.

Telegram Cleanup API

Python, FastAPI - 2 stars | github.com/thirdbase1/tg-cleanup-api

Privacy-first REST API — 14 typed endpoints, Swagger docs, Pydantic validation.

| **Impact:** Backend discipline — typed APIs, clean separation, security-first design.

OG Pulse — Wallet Tracker & Explorer

TypeScript, Next.js - 2 stars | github.com/thirdbase1/0g-pulse

Full-stack wallet tracker for OG-Testnet-Galileo — search, balances, transaction history, leaderboard.

| **Impact:** Full ownership of a shipped, live web3 product.

WHAT I BRING

- **AI-native by default.** Frontier models as collaborators.
- **I ship.** Every project above is live or deployable.
- **Curious across the stack.** TypeScript to Python to Go to Rust.

AVAILABILITY

Open to remote opportunities. Immediate start.
